Daniel Zaltsman

908-656-2556 | Seattle, WA | daniel.zaltsman92@gmail.com | [Github](#) | [Blog](#) | [LinkedIn](#)

I am a full stack developer with 7 years of experience in healthcare and passionate about contributing to user-friendly experiences. I got into medicine because I wanted to help people, and I wanted to be a part of the future of healthcare technology. I fell in love with the process of coding after being involved in indie software projects and found it to be a very rewarding experience. I am dedicated to perfecting my craft through continuous learning and perseverance.

TECHNICAL SKILLS

Ruby, Rails, SQLite3, PostgreSQL, JavaScript, React, Git, HTML, CSS

TECHNICAL PROJECTS

Movie Night - [Github](#) / [Video](#)
Recommends movies to user based on other users who liked similar movies
+ Created user interface using React JS
+ Developed Rails API and PostgreSQL backend with endpoints for users, movies, and user's liked movies
+ Integrated OAuth for user login and creation with JSON Web Tokens stored client-side with LocalStorage
+ Employed use of two third party APIs to gather movies from database and to create recommendations

Geo-Finder - [Github](#) / [Video](#)
A game that drops the player at a random street view in the world, at which point the player guesses where they are
+ Assumed leadership role to delegate responsibility between a 3 person team
+ Utilized Google Maps API to generate random street views and place markers for guesses and answers on user input
+ Created points algorithm based on distance of player guess and actual address
+ Designed Javascript logic for game functionality and Rails backend design

Trivia Trainer - [Github](#) / [Demo](#)
A trivia app that generates questions based on parameters that you set
+ Fetched questions from Opentdb API from rails/heroku backend using REST client gem
+ Produced React JS frontend with bootstrap to show questions and manage form logic
+ Frontend hosted on Netlify and backend hosted on heroku
